

# Aidite

## SuperfectZir SHTC

High Strength Pre-shaded  
Zirconia

Simple operation | Translucency 45% | 1350MPa High strength

Everyone with a healthy and beautiful smile

## Product advantage »

- SHTC is high strength pre-shaded zirconia, breaking the traditional zirconia processing flow as it is pre-shaded after sintering, eliminating the need for dyeing, shrinking evenly, maintaining shape during sintering, and being suitable for long bridge cases.

Translucency

45%

Flexural strength

1350MPa

## Shades »

## Indications »

### Recommended

Posterior full crown

Posterior full crown bridge

### Applicable

Inlay/Onlay

Anterior /Posterior cutback crown

Anterior /Posterior cutback crown bridge

Anterior /Posterior coping

Anterior /Posterior coping bridge

Screw-retained bridge

Full arch long bridge

Note: The above crown and bridge restorations all include implant restorations.

## Material parameters and application system »

Flexural strength	1350 MPa
Translucency	45%
Sintered density	$\geq 6.0 \text{ g/cm}^3$
Fracture toughness	$\geq 5 \text{ MPam}^{0.5}$
Vickers hardness	$\geq 1250 \text{ HV10}$
